

DOMESTIC & COMMERCIAL SURFACE CLEANER

slipStream® Pro 21GT

Made to tackle any surface cleaning job thrown at it, the Pro 21GT is ideal for a variety of exterior cleaning tasks including cleaning driveways, patios, paths, car parks, block paving and more!

The Pro 21GT enables a pressure of up to 3450psi and a maximum bar pressure of 230. This powers the triple arm surface cleaner, which creates a fan from the nozzles to provide effective cleaning. This package also comes with a Fan Lance and a Turbo Lance, for optimum cleaning where you need it. These two pressure washing lances provide the operator with more versatility and flexibility in their cleaning, and enables them to tackle a variety of surfaces. This system is also equipped with automatic speed control, meaning that when the trigger is released, the revs will drop which saves fuel and preventing chances of over-heating, and wear and tear.

Other features include shock absorbing buffers (front and rear), a parking brake, pressure regulator valve, large exhaust protection cover, suction/return hose, and an on-board hose reel with 20 metres of power hose. The suction/return hose has a weighted filter so that damaging particles do not enter your machine and hinder its performance over time, thereby prolonging and preserving your surface cleaner. With 20 metres of power hose, this allows the operator to be more flexible with their cleaning, and more manoeuvrability, making cleaning easier and quicker.
